

MTH (USA)

Multijet meter

Your benefits

- Robust, high grade wear resistant materials:
  Excellent measuring stability and reliability
- Measurement of low flow rates:
  Increased cost effectiveness

Applications

- For use in measurement of hot water in commercial and industrial applications where flow is in one direction only.

Properties

- Multijet impeller wheel, super dry-dial with magnetic coupling
- Register can be turned for best readout position
- Maximum operating pressure 232 psi
- Maximum operating temperature 266 °F
- Horizontal installation
- US Gallon register
- NPSM threaded connection
- High grade wear resistant and corrosion proof materials
- Inlet strainer
- Reconditionable and recyclable execution

Options

- Reed pulser IPG 14 with approx. 5 feet or 16 feet cable
  Documentation: IPG14 - EPe40217

Installation

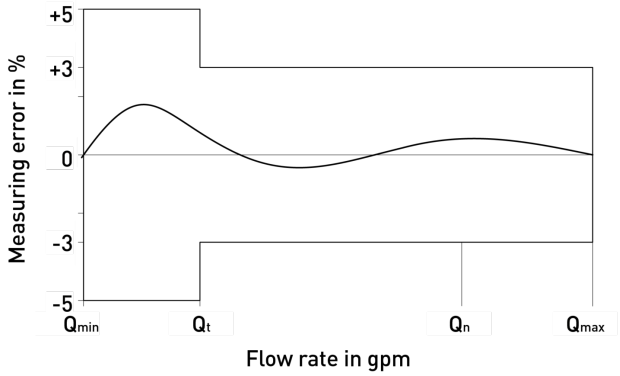

Pipeline: horizontal

Meter head: upwards

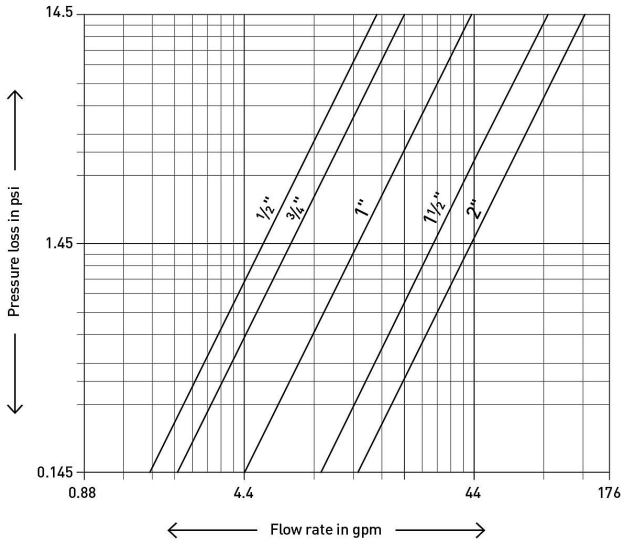

Materials

Housing	Brass (DIN 50930-6)
Sealing plate	Brass (DIN 50930-6)
Impeller	PA resp. PPS
Strainer	PVDF
O-Ring	EPDM

Measuring error curve

Typical Head Loss Curve

Pulser

The IPG 14 pulser consists of a molded insert with a clear housing to read the totalizing register. The pulse element is a dry contact reed switch rated at 4 Watts, max. voltage 42 V AC/DC, 18 Ohm resistance, approx. 10 Mio. switching cycles. The unit requires power from an external source and normally is wired in series with no regard to polarity, approx. 5 feet of 2-wire unshielded cable exist in a sealed fitting.

Pulse value table

Pulse values (1 Pulse = ... US Gallons)		
½" - 1"	1 [1)]	10
1½" / 2"	-	10

1) Only available in measuring range 1:25
